KISS Rebreathers

2009 Retail Price List

Items not included:

As mentioned on the price sheets, there are a few items that are not included in the rebreather packages. They are cylinders, sensors, pressure gauges, extra fittings such as LP & HP swivels, and the wing/harness system. Cylinders are best purchased in the country that you live, as they need to be approved. Sensors we do not sell with the units as they have an expiration date. In getting them directly from the distributors, you will be getting sensors with the best expiration date possible. The other items such as the gauges and fittings are personal to the diver. Many divers that purchase a rebreather, already own these items and do not need to purchase them again. Some divers choose to not add any extra fittings to their unit at all. This is the same for the harness/wing system. Before purchasing a new system, check with your instructor to see if your current one can be used on your new rebreather.

Shipping for the Classic and Sport KISS Rebreather Kits :

International shipping can be either collect or pre-paid. It depends on the destination, and also on current shippers pricing.

For collect shipping, we courier via an international shipping company, airport to airport. Once the shipment lands at the airport, you, the client will be contacted for further instructions. You can either pick up the order at the airport or choose to have it delivered on. On top of the shipping fee, you will also be responsible for any taxes, duties and brokerage fees. These charges usually need to be paid for when the unit is picked up or delivered. Please note that we will only ship the rebreather kit fully insured.

For pre-paid shipping, we usually ship Federal Express, door to door. This fee will include your courier, insurance and brokerage. Duty and taxes will be extra. For pre-paid shipping, we will need your complete shipping address in order to provide you with a proper quote. Please note that we will only ship the rebreather kit fully insured.

Units shipped within Canada or the USA are shipped FEDEX 2 DAY ECONOMY directly to your shipping address. This shipping method includes the brokerage fee. As the brokerage fee is a percentage of the value of the item shipped, this is the most economical way to ship a high value item in North America.

	RETAIL
Baby Booster	\$1,625.00 Canadian
Baby Booster Kit (includes the booster, whips/gauge and carry case)	\$2,436.00 Canadian
Baby Booster Seal Kit	\$ 70.00 Canadian

Shipping - Please contact us for a quote. We will need to know your shipping address and what your order is to give you an accurate quote.

ALL SHIPPING QUOTES ARE VALID FOR A PERIOD OF 2 WEEKS ONLY.
